

# Opt-in: Voluntary Licensing of My Voice

**Company/Studio:** \_\_\_\_\_  
Name, address, e-mail

I, \_\_\_\_\_  
Name, address

hereby expressly and voluntarily consent to the above-mentioned company/studio using my existing voice recordings in order to make my voice licensable for the agreed productions. I am aware that my voice constitutes a personal biometric characteristic and that processing may allow conclusions to be drawn about my identity.

## Purpose

My voice may be made available for TTS (Text-to-Speech: converting text into speech) and STS (Speech-to-Speech: applying a different voice to an existing layout). There shall be no transfer for unrestricted use, no general AI training, and no engine training. Use is strictly project-specific and limited to the technical implementation for the respective client or studios involved in the production, insofar as this is required for the specific commissioned project. No independent synthetic voice profiles or derivatives of my voice may be created for other projects or purposes.

## Scope of the License

The license is limited to the specific project and restricted in content, time, territory, and media. All rights to my voice and personality remain with me. Sub-licensing or transfer of usage rights to third parties is excluded unless expressly agreed in writing.

## Compensation

Compensation is project-based. The specific remuneration is agreed separately for each project.

## Transparency

If my voice is provided via a voice-sharing platform, its use is transparent in terms of when and for what purpose it is used (comparable to being present in a studio session), provided that the platform technically supports such transparency. If usage is based on direct release of takes from previously recorded material, usage reporting continues to be handled by the studio as before.

## Confidentiality

The voice talent agrees to treat all scripts and production content used in connection with TTS or STS productions using their voice as confidential and not disclose them to third parties.

## Additional Provision for Voice Sharing

The use of a shared voice is based on an individual agreement between the voice talent and the respective authorized user. The voice talent independently

determines the scope and conditions of use. This opt-in does not grant any independent usage rights to the operator of the technical platform used.

## Duration

Valid until revoked. Data are stored only for as long as necessary.

## My Rights (Data Protection)

I have the right to access, rectification, erasure, restriction of processing, and to object to the processing of my personal data. These rights arise in particular from the GDPR and, where applicable, from comparable data protection laws such as the California Consumer Privacy Act (CCPA/CPRA). Further details can be found in the privacy policy of the contracting party. There are no disadvantages if consent is refused.

## Revocation

Revocation may be made at any time free of charge by email to the studio's email address listed above. Upon revocation: immediate deletion of all data and termination of use.

## Scope of Use

The technical use of my voice (TTS/STS) is generally permitted in the following areas:

- Advertising / Commercial
- Corporate / Brand / Image
- E-Learning / Training
- Games / Fiction
- Other: \_\_\_\_\_

## Exclusions

The use of my voice is explicitly excluded for the following content or industries:

- Politics / Political parties
- Religion / Belief systems
- Gambling / Betting
- Alcohol / Tobacco
- Medical / Pharmaceutical
- Erotic / Adult content
- Other: \_\_\_\_\_
